GM Reports Income of \$0.3 Billion and EBIT-Adjusted of \$1.2 Billion

- EPS-diluted of \$0.17 and EPS-diluted-adjusted of \$0.62.
- COVID-19 impact on EBIT-adjusted was \$(1.4) billion.
- Ended guarter with \$33.4 billion in automotive liquidity.

Q1 2020 RESULTS	OVERVIEW Net Revenue	Income	Auto Operating Cash Flow	EPS-Diluted*
GAAP	\$ 32.7B	\$ 0.3B	\$ 0.3B	\$ 0.17
vs. Q1 2019	(6.2%)	(86.7%)	+\$2.5B	(88.5%)
	EBIT-adj. Margin	EBIT-adj.	Adj. Auto FCF	EPS-Diluted-adj.*
Non-GAAP	3.8%	\$ 1.2B	\$ (0.9) B	\$ 0.62
vs. Q1 2019	(2.8) pts	(45.9%)	+\$3B	(56%)

*includes a \$(0.28) impact from Lyft and PSA.

The strength of this company has always been its people, and I am proud to stand with our best as we confront these challenges together - as one team - while we continue our transformation. We have a track record of making swift, strategic and tough decisions to ensure our long-term viability and create value for all of our stakeholders." – Mary Barra, Chairman and CEO

SAFETY AS A TOP PRIORITY

To protect the safety of employees in response to the COVID-19 pandemic, GM extended its January holiday shutdown in China, and suspended production in North and South America in March. Under rigorous safety protocols, production was able to continue through the first quarter in Korea, and operations gradually restarted in China mid-February.

Considerable planning is underway to restart operations in North America. Based on conversations and collaboration with unions and government officials, GM is targeting to restart the majority of manufacturing operations on May 18 in the U.S. and Canada under extensive safety measures. These global, standardized measures were informed by learnings from GM facilities in China; Korea; Kokomo, Indiana; Arlington, Texas; Warren, Michigan; Customer Care & Aftersales operations, as well as collaboration with union leadership and supplier partners. These procedures meet or exceed CDC and WHO quidelines, and are designed to keep people safe when they arrive, while they work and as they leave the facility.

Operator inspects face masks at GM's Warren manufacturing facility.

MAINTAINING A STRONG LIQUIDITY POSITION

When GM suspended operations, it also moved quickly to preserve its liquidity. GM ended the quarter with a strong \$33.4 billion in automotive liquidity, including an approximately \$16 billion drawdown from its revolving credit facilities. In addition, the company extended \$3.6 billion under its three-year revolving credit agreement, and GM and GM Financial renewed their 364-day \$2 billion revolver.

GM has implemented aggressive austerity measures to preserve cash to ensure the ongoing viability of its operations. This included global executive and salaried compensation deferments, and adjusted non-critical program timing. GM has suspended the quarterly dividend on its common stock and the company's share repurchase program was also paused. In addition, GM has taken many actions over the past number of years to strengthen the business and ensure a strong foundation in preparation for a downturn.

FIGHTING A GLOBAL PANDEMIC

Early on in this crisis, GM recognized that it had the capability to quickly support production of crucial medical equipment. In April, GM began producing and shipping critical care ventilators in collaboration with Ventec Life Systems at GM's Kokomo facility. In less than a month, GM accepted a 30,000-unit order from the federal government. In a separate effort, GM temporarily converted its Warren plant to make personal protective equipment and has donated one million face masks. SAIC-GM-Wuling in China and GM Mexico have also been manufacturing face masks, and GM is preparing a plant in Canada to do the same.

SEGMENT RESULTS (EBIT-ADJUSTED-\$B)

North A	America	Intern	ational
Q1 20	Q1 19	Q1 20	Q
2.2	1.9	(0.6)	0

EBIT-adj. higher primarily as a result of strong sales of lightduty pickups and full-size SUVs, and transformational cost actions, partially offset by lower volume from suspending production.

China equity income down \$(0.5) billion year over year primarily as a result of the impact of COVID-19, partially offset by cost actions.

0119

0.0

We are focused on preserving liquidity and taking the right actions today to make the company stronger and more competitive in the long term as we navigate through these unprecedented times."

– Dhivya Suryadevara, CFO

SUPPORTING THE CUSTOMER

Putting people first also means taking care of customers. GM's CCA business continued to support essential work for customers' service and maintenance needs. Dealerships increased use of the online selling tool Shop. Click. Drive., propelling significant customer engagement. Ninety percent of participating dealers offer a touchless home delivery to ensure customers can purchase a vehicle safely. Service departments also remained open where permitted. In addition, GM Financial is offering solutions for customers, including deferring payments and waiving late fees.

FIRST QUARTER SALES

GM sales in the U.S. declined about 7 percent, driven by the effects of the pandemic. While sales have been impacted differently across geographies, for many dealers, demand for full-size trucks remained strong. Sales of GM's full-size pickups rose about 27 percent year over year, with a significant gain in retail market share. They captured 41 percent of combined lightand heavy-duty segments in the first guarter (J.D. Power). In China, following the strongest sales impact in February, the industry started to pick up in March, narrowing the monthly sales decline.

GM INTERNATIONAL RESTRUCTURING

In February, GM announced it will wind down engineering, vehicle sales - except for GM specialty vehicles - and design operations in Australia and New Zealand and retire the Holden brand by 2021. GM also agreed to sell its Rayong plant in Thailand to Great Wall Motors. As a result, the company recorded total after tax cash and non-cash charges of \$0.7 billion in the first quarter.

COMMITTED TO AN ALL-ELECTRIC FUTURE

During the pandemic, product development work on the company's future EV and AV portfolios is progressing at a rapid pace. In addition, ongoing work continues at Detroit-Hamtramck to convert the facility to be GM's first assembly plant fully devoted to EVs.

quarter.

In March, GM shared its EV strategy and showcased how its technical expertise, flexibility and scale position the company to lead in the future of EVs, growing sales guickly, efficiently and profitably. This strategy includes a modular propulsion system and a highly flexible, third-generation global EV platform powered by the proprietary Ultium battery system.

The Cruise Origin was revealed in San Francisco earlier this year, and production timing remains on track for the yet-to-be-revealed Cadillac Lyrig and GMC HUMMER EV all powered by the Ultium system.

Ultium Battery

GM's broad EV portfolio will offer a GM-estimated driving range of up to 400 miles on a full charge, with DC Fast Charging capability to charge over 100 miles of range in 10 minutes – with a path to even faster charging with next-generation technology.

Also in March, GM and Honda agreed to jointly develop two all-new EVs for Honda, based on GM's new global EV platform and Ultium battery system. Honda will leverage GM's platform to drive scale.

GENERAL MOTORS

General Motors (NYSE:GM) is a global company committed to delivering safer, better and more sustainable ways for people to get around. General Motors, its subsidiaries and its joint venture entities sell vehicles under the <u>Chevrolet</u>, <u>Buick</u>, <u>GMC</u>, <u>Cadillac</u>, <u>Holden</u>, <u>Baojun</u> and <u>Wuling</u> brands. More information on the company and its subsidiaries, including <u>OnStar</u>, a global leader in vehicle safety and security services, can be found at http://www.gm.com.

Cautionary Note on Forward-Looking Statements: This press release may include "forward-looking statements" within the meaning of the U.S. federal securities laws. We caution readers not to place undue reliance on forward-looking statements. Statements including words such as "anticipate," "appears," "approximately," "believe," "continue," "could," "designed," "effect," "estimate," "evaluate," "expect," "forecast," "goal," "initiative," "intend," "may," "objective," "outlook," "plan," "potential," "priorities," "project," "pursue," "seek," "should," "target," "when," "will," "would," or the negative of any of those words or similar expressions to identify forward-looking statements represent our current judgment about possible future events. In making these statements we rely upon assumptions and analysis based on our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we consider appropriate under the circumstances. These statements are not guarantees of future performance; they involve risks and uncertainties and actual events or results may differ materially from these statements. Factors that might cause such differences include, but are not limited to, a variety of economic, competitive and regulatory factors, many of which are beyond our control. Many of these factors are described in our Annual Report on Form 10-K and our other filings with the U.S. Securities and Exchange Commission. We undertake no obligation to update publicly or otherwise revise any forward-looking statements, whether as a result of new information, future events or other factors that affect the subject of these statements, except where we are expressly required to do so by law.

General Motors Company's (GM) non-GAAP measures include: earnings before interest and taxes (EBIT)-adjusted, presented net of noncontrolling interests; earnings before income taxes (EBT)-adjusted for our General Motors Financial Company, Inc. (GM Financial) segment; earnings per share (EPS)-diluted-adjusted; effective tax rate-adjusted (ETR-adjusted); return on invested capital-adjusted (ROIC-adjusted) and adjusted automotive free cash flow. GM's calculation of these non-GAAP measures may not be comparable to similarly titled measures of other companies due to potential differences between companies in the method of calculation. As a result, the use of these non-GAAP measures has limitations and should not be considered superior to, in isolation from, or as a substitute for, related U.S. GAAP measures.

These non-GAAP measures allow management and investors to view operating trends, perform analytical comparisons and benchmark performance between periods and among geographic regions to understand operating performance without regard to items we do not consider a component of our core operating performance. Furthermore, these non-GAAP measures allow investors the opportunity to measure and monitor our performance against our externally communicated targets and evaluate the investment decisions being made by management to improve ROIC-adjusted. Management uses these measures in its financial, investment and operational decision-making processes, for internal reporting and as part of its forecasting and budgeting processes. Further, our Board of Directors uses certain of these and other measures as key metrics to determine management performance under our performance-based compensation plans. For these reasons, we believe these non-GAAP measures are useful for our investors.

EBIT-adjusted EBIT-adjusted is presented net of noncontrolling interests and is used by management and can be used by investors to review our consolidated operating results because it excludes automotive interest income, automotive interest expense and income taxes as well as certain additional adjustments that are not considered part of our core operations. Examples of adjustments to EBIT include, but are not limited to, impairment charges on long-lived assets and other exit costs resulting from strategic shifts in our operations or discrete market and business conditions; costs arising from the ignition switch recall and related legal matters; and certain currency devaluations associated with hyperinflationary economies. For EBIT-adjusted and our other non-GAAP measures, once we have made an adjustment in the current period for an item, we will also adjust the related non-GAAP measure in any future periods in which there is an impact from the item. Our corresponding measure for our GM Financial segment is EBT-adjusted because interest income and interest expense are part of operating results when assessing and measuring the operational and financial performance of the segment.

EPS-diluted-adjusted EPS-diluted-adjusted is used by management and can be used by investors to review our consolidated diluted EPS results on a consistent basis. EPS-diluted-adjusted is calculated as net income attributable to common stockholders-diluted less adjustments noted above for EBIT-adjusted and certain income tax adjustments divided by weighted-average common shares outstanding-diluted. Examples of income tax adjustments include the establishment or reversal of significant deferred tax asset valuation allowances.

ETR-adjusted ETR-adjusted is used by management and can be used by investors to review the consolidated effective tax rate for our core operations on a consistent basis. ETR-adjusted is calculated as Income tax expense less the income tax related to the adjustments noted above for EBIT-adjusted and the income tax adjustments noted above for EPS-diluted-adjusted divided by Income before income taxes less adjustments. When we provide an expected adjusted effective tax rate, we do not provide an expected effective tax rate because the U.S. GAAP measure may include significant adjustments that are difficult to predict.

ROIC-adjusted ROIC-adjusted is used by management and can be used by investors to review our investment and capital allocation decisions. We define ROIC-adjusted as EBIT-adjusted for the trailing four quarters divided by ROIC-adjusted average net assets, which is considered to be the average equity balances adjusted for average automotive debt and interest liabilities, exclusive of finance leases; average automotive net pension and other postretirement benefits (OPEB) liabilities; and average automotive net income tax assets during the same period.

Adjusted automotive free cash flow Adjusted automotive free cash flow is used by management and can be used by investors to review the liquidity of our automotive operations and to measure and monitor our performance against our capital allocation program and evaluate our automotive liquidity against the substantial cash requirements of our automotive operations. We measure adjusted automotive free cash flow as automotive operating cash flow from operations less capital expenditures adjusted for management actions. Management actions can include voluntary events such as discretionary contributions to employee benefit plans or nonrecurring specific events such as a closure of a facility that are considered special for EBIT-adjusted purposes.

The following table reconciles segment profit (loss) to Net income attributable to stockholders under U.S. GAAP (dollars in millions):

		Three Mont	ths Ended

Automotive interest expense		(193)		(181)
Income tax expense		(357)		(137)
Net income attributable to stockholders(f)	\$	294	\$	2,157

(a) GM Financial amounts represent EBT-adjusted.

(b) GM's automotive interest income and interest expense, legacy costs from the Opel and Vauxhall businesses and certain other assets in Europe, which are primarily pension costs, corporate expenditures and certain nonsegment-specific revenues and expenses are recorded centrally in Corporate.

(c) This adjustment was excluded because of a strategic decision to rationalize our core operations by exiting or significantly reducing our presence in various international markets to focus resources on opportunities expected to deliver higher returns. The adjustment primarily consists of asset impairments, dealer restructurings, employee separation charges and sales allowances in Australia, New Zealand and Thailand.

(d) This adjustment was excluded because of a strategic decision to accelerate our transformation for the future to strengthen our core business, capitalize on the future of personal mobility and drive significant cost efficiencies. The adjustment primarily consists of accelerated depreciation.

(e) These adjustments were excluded because of the unique events associated with decisions rendered by the Superior Judicial Court of Brazil resulting in retrospective recoveries of indirect taxes.

(f) Net of Net loss attributable to noncontrolling interests.

The following table reconciles Net income (loss) attributable to stockholders under U.S. GAAP to EBIT-adjusted (dollars in millions):

Vehicle Sales

GM presents both wholesale and total vehicle sales data to assist in the analysis of our revenue and our market share. Cuba, Iran, North Korea, Sudan and Syria are subject to broad economic sanctions. Accordingly these countries are excluded from industry sales data and the corresponding calculation of GM's market share.

Wholesale vehicle sales data consists of sales to GM's dealers and distributors as well as sales to the U.S. Government and excludes vehicles sold by our joint ventures. Wholesale vehicle sales data correlates to GM's revenue recognized from the sale of vehicles, which is the largest component of Automotive net sales and revenue. In the three months ended March 31, 2020, 32.4% of our wholesale vehicle sales volume was generated outside the U.S. The following table summarizes wholesale vehicle sales by automotive segment (vehicles in thousands):

	Three Months Ended			
	March 31, 2020	March 31, 2019		
GMNA	775	859		
GMI	191	236		
Total	966	1,095		

Total vehicle sales data represents: (1) retail sales (i.e., sales to consumers who purchase new vehicles from dealers or distributors); (2) fleet sales, such as sales to large and small businesses, governments, and daily rental car companies; and (3) vehicles used by dealers in their businesses, including courtesy transportation vehicles. Total vehicle sales data includes all sales by joint ventures on a total vehicle basis, not based on our percentage ownership interest in the joint venture. Certain joint venture agreements in China allow for the contractual right to report vehicle sales of non-GM trademarked vehicles by those joint ventures, which are included in the total vehicle sales we report for China. While total vehicle sales data does not correlate directly to the revenue GM recognizes during a particular period, we believe it is indicative of the underlying demand for GM vehicles. Total vehicle sales data represents management's good faith estimate based on sales reported by GM's dealers, distributors, and joint ventures, commercially available data sources such as registration and insurance data, and internal estimates and forecasts when other data is not available.

The following table summarizes total vehicle sales by geographic region (vehicles in thousands):
